The second question is how long can you run a device on a portable power station, and that's determined by the Watt Hours. Most portable power stations are somewhere in the 250 to 3000 watt hour range, in terms of total capacity. In simple terms, if you have a 1000 Watt Hour power station, then you can run a single 100 watt appliance for 10 ...

Electrochromic power storage devices integrate energy storage and electrochromic behavior into a single full cell that can enable the visualization of the energy status by the naked eyes. One challenge for achieving practical applications is to develop intelligent and portable all-inorganic electrochromic power storage devices.
