Power bi workspace backup

Does Power BI support workspace-level storage?

Workspace-level storage, which is helpful when business units manage their own data lake or have certain data residency requirements. Backup and restore for Power BI semantic models: The Power BI semantic model backup and restore feature is supported for workspaces that are assigned to capacity or PPU.

How does Power BI backup a workspace?

Power BI associates workspaces with their backup directories based on the workspace name. With owner permissions at the storage account level, you can download backup files or copy them from their original location to the backup directory of a different workspace, and restore them there if you're a workspace admin in the target workspace as well.

Does Power BI support backup and restore?

Backup and restore for Power BI semantic models: The Power BI semantic model backup and restore feature is supported for workspaces that are assigned to capacity or PPU. This feature uses the same ADLS Gen2 account that's used for storing Power BI dataflows data (described in the previous bullet point).

How to backup data from Power BI workspace to ADLs Gen2?

On the Power BI Workspace, you need to be a workspace administrator to configure the workspace connection to ADLS gen2. To perform backups, you must be admin, member, or contributor to the workspace. Restore backups to existing datasets, you must be owner of the dataset.

What happens if I rename a workspace in Power BI?

If you rename a workspace,the backup folder in the power-bi-backup container is automatically renamed to match. However,if you have an existing folder with the same name as the renamed workspace,the automatic renaming for the backup folder fails. When using the Backup and Restore feature with Power BI,keep the following in mind.

What is a Power BI workspace?

This workspace is considered an informal workspaceto support collaborative efforts. A Power BI app isn't necessary for content viewers because the primary use of this workspace is collaboration by a small group of people who work closely together. Most team members have permission to edit content in this workspace.
