Power Pole's one pump system can run two of their immensely popular Blade shallow water anchors with a single pump. Many anglers opt to install two shallow water anchors to stop their boat from rotating on the axis of a single anchor and this new system is a huge upgrade from previous offerings. The one pump system offers a 40% weight ...

The Raptor's hydraulic pumps are bigger with fully sealed electronics. This should help reduce pump failures that often happen in wet bilges, especially on saltwater boats. Power Pole. Power Pole anchors have been designed almost 10 years ago and they have proven reliable. They are built lighter and create more flex than Raptor.
