

This set of Power Systems Multiple Choice Questions & Answers (MCQs) focuses on "Switchgear and Protection - 1". 1. The factor which influences the arc de ionisation dominantly \_\_\_\_\_ a) line voltage b) magnitude of transient fault current c) speed of reclosure

More MCQs on Electrical Engineering (Power) MCQs. Power System Instrumentation; Optimization Techniques in Power Systems MCQs; Computational Methods in Power Engineering MCQs; Computational Methods MCQs; HVDC (High Voltage Direct Current) Systems MCQs; Electric Vehicles and Charging Infrastructure MCQs; Battery Storage ...

Power Systems Multiple Choice Questions. In this MCQ you can learn and practice Power Systems objective quiz questions to test your knowledge of electrical power systems. This quiz section consists of total 30 questions. Each question carries 1 point. No negative points for wrong answers. You need to score at-least 50% to pass the test.

Power System MCQS With Explanations and Exam Notes. December 19, 2021. 1. A transmission line has a reactance of 4 Pu is operating at  $V_s = V_r = 2$  Pu. The generator is connected at the source end which is delivering 0.5 Pu of active power. Find the load angle?

Efficient and effective power system protection is crucial for maintaining the integrity and continuity of electrical supply. Electrical Engineering XYZ presents most 100+ important power system protection MCQs on important topics including fuses, relays, circuit breakers, machines, motors, transformers, alternator, grounding and protection ...

This set of Power Systems MCQs focuses on "Effect of Synchronous Machine Excitation - 2". 1. How can we check upon the transient stability of a power system? a) By checking variation in load angle b) By checking variation of real power with load angle c) Checking variation in ...

transmission system"? (a) Increase of short-circuit current of the system. (b) Availability of steady voltage at all loads at the line terminals (c) Improvement of power factor at times of moderate and heavy loads. (d) Possibility of carrying increased power for a given conductor size in case of long distance heavy power transmission.

Power Systems MCQ Questions and Answers based on the Electrical Engineering for interview, preparation of competitive exams and entrance test ... POWER SYSTEMS Power Systems Length of the cable is doubled, its capacitance C will be unchanged. ...

Power System. In this MCQ you can learn and practice Power Systems objective quiz questions to test your

# Power system mcq

knowledge of electrical engineering. This quiz section consists of total 30 questions. Each question carries 1 point. No negative points for wrong answers. You need to score at-least 50% to pass the test. Answers are available in the quiz.

This set of Power Systems Multiple Choice Questions & Answers (MCQs) focuses on "Symmetrical Component Transformation - 1". 1. The receiving end active power for a short transmission line is (where the angles have their usual meanings) View Answer. Answer: a

power system multiple choice questions. Skip to content. Your Electrical Guide Main Menu. ELECTRICAL MACHINES; POWER SYSTEMS; OTHER TOPICS; MCQs; RECENT POSTS; MCQ. Power System Multiple Choice Questions. 1. For an overhead line, the surge impedance is taken as (a) 20 - 40 ohm. (b) 70 - 80 ohms

Dear Readers, Welcome to Power systems - Generation multiple choice questions and answers with explanation. These objective type Power systems - Generation questions are very important for campus placement test, semester exams, job interviews and competitive exams like GATE, IES, PSU, NET/SET/JRF, UPSC and diploma. Specially developed for the ...

This set of Power Systems Multiple Choice Questions & Answers focuses on "Short Transmission Line - 2". 1. What is the value of charging current in short transmission lines? a) Less than medium transmission lines b) Equal to medium transmission lines c) More than medium transmission lines d) More than long transmission lines View Answer

Short interruption in power system is up to 3 minutes Key Points. Short Duration Interruptions (SDIs) can occur due to various reasons, including: Lightning Strikes: Lightning strikes can cause sudden surges or faults in the electrical system, leading to short-duration power outages. Damaged Electrical Equipment: Faults or failures in electrical equipment, such as ...

This set of Power Systems Multiple Choice Questions & Answers (MCQs) focuses on "Distribution Systems - 1". 1. A transmission and distribution engineer needed to design the sub transmission substation. The tapping component needed will be \_\_\_\_\_ a) feeder b) distributor c) transmitter s) tap-changing transformer ...

Qualexe provide Power Systems Multiple Choice Questions with complete solution. We provide best MCQ Platform for government exam quiz with detailed solutions. ... The desirable qualities of a power system are . High load factor and high diversity factor . ...

Power Systems. In this MCQ you can learn and practice Power Systems GATE objective quiz questions to test your knowledge of electrical power systems. This quiz section consists of total 30 questions. Each question carries 1 point. No negative points for wrong answers. You need to score at-least 50% to pass the test.

This set of Power Systems Multiple Choice Questions & Answers (MCQs) focuses on "Economics of Power

Generation". 1. What is the advantage of sectionalizing of power plant? a) High reliability b) Low capital cost  
c) Low maintenance d) Easy operation View Answer

Power system MCQ with Explanation 2021 | Objective Type Question OF Power system with Explanation .  
Ques 1. A shunt reactor at 100 MVAR is operated at 98% of its rated voltage and at 96% of its rated frequency. The reactive power absorbed by the reactor is

The Test: Power Systems- 1 questions and answers have been prepared according to the Electrical Engineering (EE) exam syllabus. The Test: Power Systems- 1 MCQs are made for Electrical Engineering (EE) 2024 Exam. Find important definitions, questions, notes, meanings, examples, exercises, MCQs and online tests for Test: Power Systems- 1 below.

The domains of power system where directional overcurrent relay is indispensable are . A. In case of parallel feeder protection . B. ... More Mcq. Power System; Switchgear and Protection; AC Circuit Analysis; Basic Electrical Engineering; Power plant; Network Theory; Control System; Electric Traction;

Steady-state stability of a power system is the ability of the power system to . A. Maintain voltage at the rated voltage level . B. Maintain frequency exactly at 50 Hz . C. Maintain a spinning reserve margin at all times . D. Maintain synchronism between machines and on external tie lines
