Do solar sensor lights deter intruders?

Solar sensor lights are a great deterring intruders and lighting up your outdoor. Learn how to install a solar sensor light with this guide from Bunnings.

Where should outdoor solar lights be placed?

To get the best results from your outdoor solar lights, place them where they get 6 to 8 hours of direct sunlight. If they're designed to be wall-mounted, consider placing them up high, so they're closer to the sun.

What are the different types of outdoor solar lights?

Based on their light output, outdoor solar lights fall into three general types: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the solar energy gathered is a limited resource, so consider when you want the lights to shine and for how long.

Are solar-powered outdoor lights a good idea?

Using solar-powered outdoor lights can set that glowing backyard ambiance in a more sustainable way, and eliminates the need for long, ugly cords or constant battery replacement. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

How do you connect a solar panel to a light bulb?

Once the solar panel is in place, you'll need to connect it to the bulb. You can do this by using a wire connector or soldering the wires together. If you're not comfortable doing this, you can always hire an electrician to do it for you. You'll need to install a light sensor for the light to turn on and off automatically.

Outdoor security lights are usually wall mounted; they are best placed approximately 1.8 - 3 metres above the ground, angled downwards. Outdoor lights that are higher up will produce a wider radius of light. The best outdoor security lighting for easy installation will be solar powered.
