million in investments in disadvantaged ...

New York State Energy Research and Development Authority President and CEO Doreen M. Harris said, "With the issuance of today's supply chain funding opportunity and requests for input on our next offshore wind solicitations, we continue to demonstrate a steadfast commitment to moving large-scale renewable energy forward on a competitive ...

I thank our many experts, industry leaders, and partners for their participation at ensuring New York is well positioned in leading the clean energy transition." New York State Energy Research and Development Authority President and CEO Doreen M. Harris said, "Innovative thinking paired with the exploration of next generation technologies ...

New York State Energy Research and Development Authority Chair Richard Kauffman said, "I am honored to chair New York's Future Energy Economy Summit. At the same time as New York State accelerates its commitments to solar and wind, we need to assess the role that emerging technologies can play in helping New York achieve a zero-emissions grid.

New York State Energy Research and Development Authority President and CEO and Climate Action Council Co-Chair Doreen M. Harris said, "New York is moving faster than ever before with the advancement of large-scale renewable energy projects as we continue to transform the way homes and businesses across the State are powered. The approval of ...

The 2023 New York Clean Energy Industry Report released today by the New York State Energy Research and Development Authority (NYSERDA) provides data on the State's clean energy industry through the end of 2022. The report shows New York's clean energy economy grew 3.5 percent from 2021 to 2022, outpacing statewide economic growth at 3 ...

New York State Energy Research and Development Authority President and CEO Doreen M. Harris said, "Energy storage is crucial as New York works to decarbonize our electric grid, manage increased energy loads, and optimize the integration and use of clean, renewable energy. The roadmap approved today by the New York State Public Service ...

NYS Guide to Inflation Reduction Act Savings: Combining IRA tax credits and New York State incentives can lower the cost of clean energy equipment and upgrades to your home or business. Transforming Brownfields for a Greener Future: New York is working with communities to advance renewable energy development on underused spaces.

The Clean Path New York project was formed as a response to a request for proposals from the New York State Energy Research and Development Authority (NYSERDA) aimed at increasing the penetration of renewable energy into New York City. The project is a partnership of the New York Power Authority, Invenergy and energyRe.

Renewable energy developers new york

Governor Kathy Hochul today announced a new large-scale renewable energy solicitation to deliver clean electricity to New Yorkers. Building on New York's 10-Point Action Plan, this solicitation seeks proposals for the development of new large-scale land-based renewable energy projects which are expected to spur billions of dollars in clean energy ...

The Renewable Energy Standard (RES) is a mechanism enacted by the Clean Energy Standard to help New York State reach its ambitious clean energy goals and transition toward a low carbon energy system. The RES requires utilities and other load serving entities in the State to procure Tier 1 renewable energy certificates (RECs).

This Action Plan serves to reinforce New York State's dedication to clean energy development, sustainability, and economic growth and supports the State's progress towards achieving the Climate Act goals, including obtaining 70 percent of the State's electricity from renewable sources by 2030. New York State's Nation-Leading Climate Plan

The New York State Energy Research and Development Authority (NYSERDA) facilitates change through the widespread development and use of innovative technologies to improve the State's energy, economic, and environmental well-being. ... renewable energy projects and advances those sites for eventual publicly-noticed competitive solicitation to ...

Collaborating to Advance Renewable Energy Development. To help meet New York's ambitious goals and support the responsible development of clean energy, the Renewables on the Ground Roundtable brought together diverse stakeholders to identify obstacles to siting large-scale wind and solar power and develop strategies to overcome the ...

Aimed at increasing new renewable energy development from eligible resources, including solar thermal, solar PV, on-land and offshore wind, hydroelectric, geothermal, and other technologies that do not utilize fossil fuels to generate electricity. ... Tier 4 - New York City Renewable Energy Aims to increase the penetration of renewable energy ...

WHITE PLAINS--The New York Power Authority (NYPA) today issued a Request for Information (RFI) to understand potential interest and opportunities for NYPA to collaborate with renewable developers, contractors, and companies to develop, own, and operate renewable energy generating projects and storage systems, including solar photovoltaic energy, wind ...
