Rheem offers a range of products, including gas water heaters, electric water heaters, hybrid water heaters, and solar water heaters. They offer some of the best solar water heaters for home. A. Rheem Solar 52L300SS/2L (300 litres) Key Features: Stainless Steel inner storage tank that is resistant to corrosion. No sacrificial anode is required.

Does Rheem have a hot water system?

Our Rheem solar hot water system (stainless steel tank) was installed 1 year and 8 months ago (South West Victoria) We're happy with our unit and it provides us with all the hot water we need.

Are Rheem water heaters good for commercial use?

Commercial tankless units: Rheem has four models of tankless water heaters for commercial use. Each unit comes with a high temperature chip option that increases the output water temperature by 45-degrees. All four models are said to be 84-94 percent efficient. Warranties: Each Rheem water heater comes with a limited warranty.

Should I use Rheem or solar?

The reviewer does not recommend Rheem or solar based on their personal experience. They relied on Rheem and ETSA for their expertise, but now believe that the solar panels were inappropriately installed on a western facing roof. As a result, their electricity usage for hot water increased from 3 kilowatts/day to 4 kilowatts/day on average.

What is a Rheem Premier Hiline solar water heater?

The Rheem Premier Hiline solar water heater is ideal for cooler climates in both suburban and rural settings, in areas prone to frost and with low mineral content. With the tank on the roof above the collectors, it's a great option when ground access is limited, and power supplies are not secure.
