Energy storage devices can manage the amount of power required to supply customers when need is greatest. They can also help make renewable energy--whose power output cannot be controlled by grid operators--smooth and dispatchable. Energy storage devices can also balance microgrids to achieve an appropriate match of generation and load....

Further details about Brazil's largest battery storage project to date have been revealed including its integrators and equipment providers. The inauguration of the 30MW/60MWh system took place last year, on the networks of transmission system operator (TSO) ISO CTEEP, as reported by Energy-Storage.news in November.

Three energy storage systems totalling 32MW, including two-hour and three-hour duration batteries, act as absorbers of surplus renewable energy on the grid. The other is a flexibility tender: RTE sought options in four strategic locations where surplus renewable generation and growth in load from EV uptake is causing grid congestion at substations.

Oil and gas major TotalEnergies has put a 380MW solar PV, 255MWh battery storage project into commercial operation in the ERCOT, Texas market. Located south of Houston, Myrtle Solar is co-located with 225MWh of energy storage systems (ESS) supplied by affiliate entity Saft, and includes 705,000 solar panels.
