

ScottishPower Renewables has received consent for its Hollandmey renewable energy development in Caithness, 8 km southwest of John o' Groats. ... alongside solar panels of around 15 MW and a 15 MW battery energy storage facility. Gillian Noble, Managing Director, Onshore Origination and Development at ScottishPower Renewables, said: "We ...

Renewable energy is not only at the centre of our fight against climate change but also driving economic growth, with billions of pounds of investment being made in Scotland every year. Scotland's renewable energy industry already supports more than 27,000 jobs and is worth £5.6 billion to the Scottish economy.

This report explains the complex market opportunities for UK energy storage and sets out a series of far-reaching recommendations to level the playing field for rapidly-developing energy storage technologies - some of which are locked out of current market arrangements.

Scottish Renewables will call for a new body to assess hydro electric pumped storage potential aimed to unlock £1bn of investment and provide a massive boost to UK energy security. The UK and Scottish Governments have been advised by Scottish Renewables to join forces intended to advance the electricity storage technology capable of operating ...

Community and Renewable Energy Scheme (CARES) We established our Community and Renewable Energy Scheme (CARES) to encourage local and community ownership of renewable energy projects across Scotland and to help maximise the benefits of renewable energy systems, whether commercial or community owned.

UK energy storage developer Kona Energy said today that it has secured consent from the Scottish Government for the construction of a 228-MW/456-MWh battery energy storage system (BESS) near Dalkeith in East Lothian. The facility, dubbed Smeaton BESS, will store energy from renewable sources and release it during peak demand.

The Scottish Government is taking action to scale up renewable technologies to transform and expand Scotland's clean energy generation sector. It is also working to ensure Scotland maximises the economic benefits the sector will bring through commitments such as providing up to £500million to leverage private investments to support ...

UK-based Zenobe has achieved financial close on a 300-MW/600-MWh battery energy storage project in Scotland, enabling it to initiate construction works. ... Zenobe reaches financial close on 300-MW Scottish BESS project. ... Renewables Now is an independent one-stop shop for business news and market intelligence for the global renewable energy ...

Ross Turbet, Head of Investment Management for Hydro, SSE Renewables, said: "As the UK transitions to net zero, the development of additional pumped storage hydro projects will be crucial for energy security and for balancing an increasingly renewables-led energy system during periods when the wind doesn't blow, and the sun doesn't shine.

Star Renewable Energy ScottishPower Renewables for Onshore Wind Week 2018. CONTRIBUTION TO SKILLS AWARD Sponsored by Senvion. Nigg Skills Academy University of Strathclyde and University of Edinburgh for the Centre for Doctoral Training in Wind and Marine Energy Systems - WINNER Scottish and Southern Electricity Networks" Workforce Renewal ...

Renewable energy storage specialist Apatura has secured planning permission for a major new Battery Energy Storage System (BESS) in Port Glasgow. ... When it comes online, it will make a substantial contribution to the Scottish Government's goal of generating 50% of Scotland's overall energy consumption from renewable sources, and by 2050 ...

Director of Policy, Scottish Renewables. Morag is Scottish Renewables" Director of Policy. Her work involves overseeing Scottish Renewables" policy function and key projects within Scotland's leading renewables trade body, working on behalf of 300+ organisations to grow Scotland's renewable energy sector and sustain its position at the ...

Scottish Renewables, the voice of the renewable energy industry in Scotland, is calling on the UK Government to urgently deliver the measures it has promised to enable investment in large-scale, long duration energy storage so developers can deliver the existing pipeline of "shovel ready" pumped storage hydro projects.

clean, renewable energy are required. As many of these technologies, such as offshore wind, are intermittent, flexible low carbon energy generation and storage assets are needed to support the grid, which includes energy storage. As the established and proven technology, pumped storage hydro is well-placed to play this role.

releasing renewable energy into the system when renewable output decreases. ... Coire Glas has the potential to be Britain's biggest pumped hydro storage scheme in 40 years. This Scottish Highlands project could power 3 million homes for up to 24 hours. And more than double Great Britain's total current electricity storage.

As of the end of March 2024, there are 790 renewable energy projects, with an estimated capacity of 46.8 GW in the planning pipeline. The largest contributor to this potential increase in capacity is storage (20.2 GW). In 2022, there was 35g of CO₂e/kWh of greenhouse gas emissions associated with electricity generation in Scotland.

A NEW interactive map has been drawn up which reveals the scale and progress of Scotland's renewable energy projects. ... pumped-storage hydroelectricity, which accounts for 740 MW and large hydro projects at

422.6 MW. Offshore wind projects under construction will generate another 2.42k MW of power, with onshore wind projects being built ...

It was funded by Scottish Renewables, the British Hydropower Association [BHA], Buccleuch, CCSQ, Drax Group, Intelligent Land Investments Group and SSE Renewables. British Hydropower Association Chief Executive Simon Hamlyn said: "The publication of this report demonstrates just how important pumped storage hydro is to the UK energy mix.

up to £1,500 extra for energy efficiency improvements; up to £1,500 extra for clean heating systems; If you're unsure, Home Energy Scotland can tell you if you're a rural household. What you can get funding for. You can get a grant or loan for improvements that are recommended in either your home's: Energy Performance Certificate (EPC)

Statement 2023/24 revealed unanimous optimism about Scotland's future in the renewable energy sector. The findings underscore Scotland's position as an attractive hub for renewable energy investment, a creator of green jobs and a leader in sustainable economic growth. Apollo Scotland's renewable energy industry and its supply

Whitelee Wind Farm is operated by Scottish Power Renewables and is the largest on-shore wind farm in the United Kingdom with a total capacity of 539 megawatts (MW). [1]The production of renewable energy in Scotland is a topic that came to the fore in technical, economic, and political terms during the opening years of the 21st century. [2] The natural resource base for ...

A fully integrated North Sea Grid would open up opportunities for the large-scale export of Scottish renewable energy to the rest of Europe, also realising Scotland as a world-leading destination for the import and storage of CO₂. We will work with key industry stakeholders and partner countries towards the goal of a fully interconnected North ...
