

Sealed power engine systems

What are sealed power engine products?

Sealed Power engine products are application-engineered components, including pistons, piston rings, engine bearings, oil pumps and lifters. These proven replacement parts are the result of product development efforts, dedicated to putting only the absolute best on the street.

What are Sealed Power parts?

Renowned for their durability and precision, Sealed Power parts are engineered to enhance your engine's efficiency and power. Our comprehensive range includes everything from Sealed Power bearings and pistons to rings and gaskets, designed to meet the rigorous demands of both daily driving and high-performance applications.

Why should you use sealed power parts?

Professionals trust Sealed Power parts for premium passenger car and light truck rebuilds. They meet industry standards. Rely on Sealed Power products for your next engine rebuild or repair. Sealed Power's range of engine replacement parts provide your vehicle with the original equipment quality to keep it running like brand new.

Where can I find sealed power engine parts?

Sealed Power is featured on Parts Geek's online catalog page, and you can search the catalog using a variety of filters to find the correct item for your car's make and model. The Sealed Power product line offers a comprehensive collection of engine replacement parts for your vehicle.

How do I order Sealed Power parts?

Call us toll free at 1-800-541-9352 to order. When you're on the hunt for a top-of-the-line internal engine component, look no further than Sealed Power. Whether you're enhancing your existing engine or embarking on a complete rebuild, Sealed Power products are the automotive industry standard for replacement parts worldwide.

Why should you choose Sealed Power engine components?

In fact, Sealed Power's full range of engine components incorporate advanced in-house engineering and machining technologies combined with proprietary metallurgies that can improve fuel economy, reduce emissions and add durability to both gasoline and diesel engines.

Sealed Power Engine Assembly Prelubes. Sealed Power engine assembly prelubes have been proven effective by more than 30 years of use on the assembly lines of U.S. car, truck, and off-road engine manufacturers. They are formulated especially for prelubrication of camshaft lobes and lifters (mechanical and hydraulic) prior to engine oil circulation.

Sealed power engine systems

Has anyone ever used one of these Pressurized engine prelubers? Like a Melling MPL-101 or a Sealed Power T40? I searched here and Google and found no BITOG threads about it. Ive always used the shaft things you hook up to the drill and yank the distributor out and prime. Now as most engines have front mounted pumps, the old shaft system doesn't ...

Sealed Power 1923M Engine Camshaft Bearing Set Your cart. Body. Frame ... I ordered a Flowmaster cat back system for my 2012 F-150. The order arrived the day they said it would and the product came at a fair price. Well done. Bobc775. 2/5/2016 2:12 PM. Excellent customer service. Treated me very well.

Sealed Power A-Series engine bearings have a small percentage of silicon mixed in with the aluminum and tin that make up the bearing-surface alloy. The silicon resists wear while polishing the journals of a crank surface during operation. A bored Micro-groove design helps to minimize debris embedding, which can score the crank's surface.
