Can energy companies sell power into Alberta's grid?

Not only can energy companies sell the power they generate into Alberta's grid, but they can also get a guaranteed price for that power through contracts with corporations looking to lower their own carbon footprint. Power purchase agreements, or PPAs, have been a crucial backing force for the province's renewable energy industry.

Can a business buy renewable electricity in Alberta?

Businesses can acquire renewable electricity in Alberta directly from a renewable generator. However, all electricity that is not consumed on site in Alberta must be exchanged in the Alberta Power Pool.

What percentage of Alberta's electricity is renewable?

By 2020, renewables, including wind and solar, made up close to 8 per cent of Alberta's electricity generation. The leading source of additions in renewables are corporate power purchase agreements. Western Producer file photo. This article was published by the Canada Energy Regulator on Feb. 9, 2022.

Will Canada buy a 20-year PPA for Alberta renewable power?

Following its success, the Government of Canada followed suit and issued a request for information in April 2020 indicating its intention to procure one or more 20-year PPAs for 200,000 to 280,000 MWh of Alberta renewable power annually.

What is the Alberta renewable electricity program (Rep)?

In 2017 and 2018, the Alberta Renewable Electricity Program (REP) accelerated renewable project development in Alberta by awarding PPAs for 12 renewable wind projects (see Table 2 in Appendix A below), representing a total of 1,359 megawatts (MW) of incremental nameplate renewable generation capacity for the province.

Will Alberta dissolve the electricity balancing pool?

Alberta is moving to dissolve the electricity Balancing Pool. Here's why that matters to you Bill 22 also adds provisions for the dissolution of the Balancing Pool, the organization tasked with managing power purchase agreements under Alberta's privatized energy market.

Renewable Energy Development in Alberta: Regulatory Resources for Municipalities November 1, 2017 ... Establishes the Commission, membership, authority and Assigns duties and powers to the Alberta Utilities Commission. ... Allows an energy producer of less than 1 MW power to send electricity to the grid, without an

Alberta is the fastest growing jurisdiction for renewable power development in Canada. Over the past decade, the province has emerged as a national leader in the renewable energy space because of: (i) the strength of its
