

# Solar companies with battery backup

What are the best solar battery storage brands of 2024?

Our solar experts chose Enphase, Tesla, Canadian Solar, Panasonic, and Qcells as the best solar battery storage brands of 2024. We rate batteries by reviewing storage capacity, power output, safety considerations, system design and usability, warranty, company financial performance, U.S. investment, price, and industry opinion.

Do solar batteries have backup power for grid outages?

Backup power for grid outages is traditionally one of the most desired features of a solar battery. While most batteries have this feature, a few stand above the rest in 2024. Quick facts: What we like:

Who makes solar batteries?

German energy company Sonnen has long focused its efforts on the production of solar batteries. Since 2017, Sonnen has marketed its batteries in the United States through a network of installers. The company previously only offered luxury solar battery solutions that exceeded the budget of most homeowners.

How many kilowatts can a solar backup battery store?

A typical solar backup battery can store somewhere around 10 kilowatt-hours. "I don't have to tell you that this cannot run your whole house for a day," said EnergySage's Aggarwal. Batteries are generally stackable, which means you can string multiple batteries together to increase your storage. But, of course, doing so is not cheap.

Can I add battery backup to my solar system?

The federal Inflation Reduction Act of 2022 also contains incentives that may affect your decision to add battery backup to an existing solar system: Through 2032, you'll be able to claim 30% of the project cost as a tax credit when you file with the IRS.
