

Solar energy companies in alaska

Is Alaska solar a good solar company?

While Alaska Solar only offers one solar panel brand -- Qcells -- the panels' better-than-average efficiency rating (20.6%) makes them suitable for low-light conditions. However, Alaska Solar has limited financing options (no leases or power purchase agreements) and only offers the manufacturer's warranty for the equipment.

Should Alaskans get solar panels?

Despite the slow adoption, Alaskans have many reasons to consider solar panels, according to Chris Rose, founder and CEO of the Renewable Energy Alaska Project, a clean energy nonprofit. "In Alaska, there used to be the question, 'Well, why get solar if it's pretty dark three months a year?'" Rose said.

How do I choose a solar company in Alaska?

First, calculate your annual energy needs (measured in kWh) from a year's worth of utility bills. Then, visit the websites of solar companies that serve Alaska and gather information about their years in business, equipment offerings, financing options, warranties, and other basics.

How much do solar panels cost in Alaska?

On average, solar panels in Alaska cost around \$2.65 per watt. This means for a typical residential solar system of around 5 kW (5,000 watts), the total cost would be about \$13,250 before any incentives or rebates. It's best to consult with local solar installation companies to get a precise estimate for your specific situation.

What grants are available for solar panels in Alaska?

In Alaska, the Alaska Energy Authority occasionally offers grants for renewable energy projects, including solar, through programs like the Renewable Energy Fund. These grants are typically available for larger community-scale projects. Local utility companies in Alaska provide notable incentives for solar panel users.

Who installs solar panels in Anchorage?

Founded in 2015, Arctic Solar Ventures installs grid-tied solar systems and solar batteries in and around Anchorage. The company specializes in residential solar installations and solid-state battery systems. ASV primarily installs REC solar panels -- but the panels do have a high efficiency rating of 22.3%.
