

How much does a solar inverter cost?

A good-quality 5kW single-phase solar inverter costs \$1,320 - \$2,500. A 3-phase solar inverter costs between \$1,900 and \$2,300, depending on the quality. While inverters have a 15-year lifespan, but some makes and models are more reliable than others. Speak to your local installer about the best brands and models currently available.

How much does a 5kw solar inverter cost?

For example, decent-quality 5kW solar inverters, which can support up to 6.6kW of panels, start at \$1,000 for budget single-phase models (e.g., Sungrow, Goodwe, or Solis) and up to \$2,000 for premium single-phase models (e.g., Fronius or SMA). If you want a 3-phase, 5kW inverter; add around \$400 to those prices.

What are the best solar inverters in Australia?

Arguably one of the top solar inverters in Australia is the Fronius Primo. As a single-phase device, available in a variety of sizes, this inverter is a heavy favourite among Aussies, often regarded for its innovative technologies, high efficiency and intelligent communication and monitoring software.

Which solar inverter should I buy?

The capacity of the inverter you purchase depends on the size of your solar system. Always buy an inverter that can handle the amount of power your panels are likely to produce. Sometimes, a lower-rated inverter is used with a larger solar system. For example, a 5kW inverter is suitable for use with a 6.6kW solar system.
