How do I choose a solar installation company in Chicago?

With 90 solar companies in the area and the median Chicago household size as 1,800 square feet, you should get a basic idea of how many options are at your disposal and what size solar system you'll need for your home. Below are a handful of other important aspects of choosing a solar installation company in the Chicago metro area.

How much does solar cost in Chicago IL?

The average price per watt of solar power in Chicago, IL is \$2.99/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$23,090 for a 11.04 kW system.

Should I hire a solar company in Chicago?

The city of Chicago recommends that residents hire a company with experience installing solar panels in the area. Because the service areas for local companies are smaller than their nationwide counterparts, they may have more firsthand experience with projects similar to yours.

Why should you choose a solar company in Chicago?

Chicago homeowners have several reasons to choose a solar company like Sunrun for their solar panels. With the plummeting cost of residential solar panels and home batteries, and an average of 189 sunny days per year, it's no surprise that more and more homeowners are seeking energy independence.

Do solar panels need direct sunlight in Chicago?

While Chicago is better known for its wind than its sunny days, homeowners can be at ease knowing that solar panels don't need direct sunlight to operate. Plus, the city government offers support and guidance to streamline the installation process. What's the difference between national and local installers?

Does Chicago have a solar PV project?

In 2012, the City of Chicago and ComEd were awarded a grant under the U.S. Department of Energy's SunShot Initiative to support solar PV installations by reducing market barriers and soft costs.

For homeowners in Chicago who expect to stay in their residence beyond the solar payback period, solar panels make an excellent investment. A 5 kW solar system in Chicago, IL might save you an average of \$19,737.6 over 20 years, with the break even point typically being 8 ...
