

Solar panels connecticut

What are the benefits of installing solar panels in Connecticut?

The advantages of installing solar panels in Connecticut are that there are both state-based incentives and the federal tax credit available. In addition, Connecticut also has expensive utility rates which makes the overall return on investment for an installation of residential solar panels in the state one of the best in the nation.

Is it worth it to install solar panels in Connecticut?

Yes, solar is worth it in Connecticut! In fact, solar panels are worth it in most areas, though certain factors - including the cost of electricity, available incentives, the climate, and sun angle - will all impact how quickly you break even on your investment relative to other areas.

What is the average cost per watt of solar panels in Connecticut?

Connecticut's average cost of a solar panel installation ranges from \$13,345 to \$18,055. On a cost per watt (\$/W) basis, a solar panel installation in Connecticut ranges in price from \$2.67 to \$3.61. See how Connecticut compares to solar panel costs across the U.S.

How long does it take to pay off a solar panel installation in Connecticut?

A critical question many property owners have when they are considering installing solar panels is the amount of time it will take to recover their initial investment through electricity savings. This question is defined as the solar payback period. For Connecticut, the average solar payback period is 9.18 years.

This is the 2021 list of Top Solar Contractors completing work in Connecticut. The kilowatts listed as being installed in the state reflect only kilowatts installed in Connecticut in 2020.
