

There are three main ways to pay for your home solar system: an upfront cash payment, a solar loan, or through a lease or power purchase agreement (PPA). If you can't afford to pay for your system out-of-pocket, solar financing allows homeowners to use products like loans and leases to finance the purchase of a solar system by spreading out ...

While going solar carries the reputation of having a high upfront cost, more than half of solar owners choose to finance with solar loans. And many of those solar loans come with zero down payment. In fact, some homeowners with the means to pay cash choose to ...

The average homeowner doesn't necessarily have \$20,000 - \$30,000 on hand to pay for solar panels, which is why taking out a solar loan is one the most common ways to finance a solar energy system. You can also finance your solar energy system with other types of loans such as a home equity loan and or HELOC.

This guide is designed to help homeowners navigate the complex landscape of residential solar photovoltaic (PV) system financing and select the best option for their needs. It describes three popular residential solar financing choices--leases, PPAs, ...
