Go Power! is excited to share that we have ...

Solar panels can last anywhere between 25 to 30 years, sometimes more. This doesn't mean that the panels on your roof will stop producing electricity after a couple of decades. It just means their energy production will decrease by what solar panel manufacturers consider optimal to meet the average household's energy needs. With proper care ...

The potential for solar energy to be harnessed as solar power is enormous, since about 200,000 times the world's total daily electric-generating capacity is received by Earth every day in the form of solar energy. Unfortunately, though solar energy itself is free, the high cost of its collection, conversion, and storage still limits its exploitation in many places.
