Chris was fantastic in helping my partner and I installing our first solar system. Chris and his team were amazing in helping us install our 25 x 470W Aiko Neostar panels, 10kw Sungrow hybrid inverter as well as a 22kw 3 phase Zappi EV charger. Would highly recommend Chris, and we will be suggesting Chris to our parents and friends who are thinking about upgrading or installing ...

With the 10 amp and 60V max, do you know the most economical way to get that in? I would love to find some rigid panels that have a low ( or appropriate) VOC as to be able to run as few panels as possible, simply in series to get to that 500. Know any specific panels that are not a fortune, or have any tips Im just not seeing?
