

and water, and broadband internet. BlueGEN is compact and occupies minimal floor space in either a plant room or utility area. Our installation partners are fully trained and qualified to connect your BlueGEN to the mains utilities. The BlueGEN will be monitored and controlled remotely over the internet by our BlueGEN-net system.

SOLIDpower is an international group of companies, leader in the field of SOFC (Solid Oxide Fuel Cell) technologies and manufacturer of BlueGEN, the world's most efficient micro-CHP (combined heat and power) appliance. Founded at the end of 2006 in Italy, it has rapidly developed into today's corporation with branches also in Germany, Switzerland and Australia...

Der BlueGEN von SOLIDpower bietet einen der höchsten elektrischen Wirkungsgrade und hat seine Zuverlässigkeit bereits in Hunderten Installationen weltweit demonstriert. Im europaweiten Feldtest wird zudem mit der EnGen-2500 das zukünftige Design zur Kostenoptimierung und zur Einführung einer einheitlichen Stack-Plattform im Feld erprobt.

Thermische Leistung und Temperaturdifferenz der Brennstoffzelle BLUEGEN BG -15 in Abhängigkeit von der Rücklauftemperatur und elektrischen Leistung Die SOLIDpower BLUEGEN BG-15 ist eine modulierende Brennstoffzelle und kann jährlich bis zu 13.000 kWh elektrische und täglich bis zu 20,5 kWh thermische Energie liefern. Die thermische Leis-

2,500 Bluegen fuel cells installed for decentralized power generation with low CO2 emissions Bluegen BG-15 special conditions for SHK craft at ISH digital The t... For over 25 years, FCW has been the go-to source for news, information, and analysis. ... Solidpower Opens Europe's Largest Plant for the Production of Fuel Cell Stacks. By.

Solidpower Expands its Fuel Cell Product Portfolio: The Bluegen BG-15 Home is Coming. By. Fuel Cells Works. July 30, 2021 at 2:40 PM EDT. From August 2nd, homeowners can look forward to it: the smart power generator for home is now finally available in an even slimmer home edition. ...

BLUEGEN Pro78 BLUEGEN Pro90 Operating mode Continuous Power Power Modulation Fuel Cell Type SOFC SOFC Service interval yearly yearly Monitoring 24/7 24/7 Customer interface BLUEGEN-net via Web and Mobile application, ModBus BLUEGEN-net via Web and Mobile application, ModBus Output BLUEGEN Pro78 BLUEGEN Pro90 Electrical AC ...

BLUEGEN BG-15: Produzione affidabile di energia. 24 ore su 24, 7 giorni su 7. Il micro-cogeneratore BLUEGEN estrae idrogeno dal gas naturale e lo converte in energia elettrica e termica utilizzando la tecnologia delle celle a combustibile. Con un'efficienza totale fino all' 89%, BLUEGEN produce fino a

11.300 kWh elettrici e 6.500 kWh ...

SOLIDPower is the manufacturer of BlueGEN, the leading stationary fuel cell system, which is based on innovative Solid Oxide Fuel Cell (SOFC) technology for highly efficient generation of power and heat. SOLIDPower is headquartered in Mezzolombardo, Italy with a distribution hub in Heinsberg, Germany.

"The swift installation of the 1000th Bluegen show once more that the market demand for fuel cells is increasing. We're excited that experienced installers like Frank Ziegeler have recognised the potential of Bluegen and become certified partners of Solidpower", said Andreas Ballhausen, Managing Director of Solidpower in Germany.

Compact solutions for highly efficient energy. BLUEGEN is a brand of the SolydEra group. One of the world's leading companies in the field of high-temperature fuel cell technology (SOFC, solid oxide fuel cells). The group develops, manufactures and markets fuel cell systems for generating power and heat in commercial and residential buildings at locations in Italy, Germany, ...

THE BLUEGEN BG-15 REDEFINES THE POWER SUPPLY; Under the motto POWEREVOLUTION, the solemn product launch of the new micro-CHP BlueGEN BG-15 from manufacturer SOLIDpower took place on Wednesday, November 21, 2018 in Heinsberg, North Rhine-Westphalia.

developed by SOLIDpower SA (Solydera, since 03.10.22 (Solydera, 2022). BlueGEN is a commercial micro-CHP system targeted to small businesses, private households, and office ... The SOFC (BlueGEN system) comprises a pre-reformer, the SOFC stack, an afterburner and several heat exchangers (Ferreira et al. 2019). In the pre-reformer, the CH₄

Een contract met een waarde van minimaal 10 miljoen Euro betreffende de levering van ten minste 550 BlueGENs, de brandstofcel-stroomgeneratoren van SOLIDpower GmbH, aan de Belgische partner Elugie bvba, is het antwoord op de toenemende interesse van de Belgen in een efficiënte en betrouwbare stroomvoorziening thuis. "Zowel eigenaren van ...

SOLIDpower is an international group of companies, leader in the field of SOFC (Solid Oxide Fuel Cell) technologies and manufacturer of BlueGEN, the world's most efficient micro-CHP (combined heat and power) appliance. Founded at the end of 2006 in Italy, it has rapidly developed into today's corporation with branches also in Germany, Switzerland and Australia after the ...

The new, more compact BlueGen BG-15 Home micro combined heat and power (CHP) system is targeted at private residential customers, producing up to 8700 kWh of electricity per annum compared with up to 13 000 kWh per annum for the standard BlueGen BG-15 unit [FCB, April 2020, p8]. This means that users with high baseload demand at home, even at ...

We are working with. Solid Power has extensive partnerships with both BMW and Ford to jointly develop

Solid power bluegen

all-solid-state batteries. In October 2021, Solid Power announced a partnership with SK Innovation to produce Solid Power's automotive-scale all-solid-state battery cells utilizing Solid Power's sulfide-based solid electrolyte, proprietary cell designs and production processes.

SolydEra combines the individual cells into stacks, fuel cell modules and large stack modules for various applications. The technology - engineered, crafted, and put into function by SolydEra's teams of experts and innovative researchers, specialists, and system engineers - is the basis for powerful current and future energy solutions.

From the point of view of the operator of a Bluegen BG-15, this means lower costs, low CO₂ emissions, no SO_x, no NO_x and no particulate emissions. In addition, fuel cells are "hydrogen-ready" and can be operated 100% climate-neutrally in the future, as soon as the necessary hydrogen or green methane is available across the board.

BlueGen was developed by SolidPower in Germany. The company has so far installed 1,000 units of this type and can look back on millions of operating hours in the field. In contrast to the Viessmann Vitocalor system, the BlueGen's solid fuel cell emits almost no waste heat. It can be run as an electricity generating system and there is no need ...

Twelve years after the first BlueGen system came to market, SOLIDpower will launch the next generation of its fuel cell units, called BG-15, in spring. On Nov. 21, 2018, it celebrated the new product announcement by taking partners, employees, the press and many other invited guests on a tour of its manufacturing plant
