

Does Su-Vastika have a lift UPS system?

\*Lift UPS Systems: Su-vastika is also installed more than 500 lift UPS systems, which provide uninterrupted power supply to elevators and Lifts. These Lift UPS has the Lithium battery option as well which keeps the lift working for backup without any break time.

Does Su-Vastika offer lithium batteries?

Su-vastika has already developed Lithium batteries for the existing Lithium Inverters, Lithium UPS, Lithium-ion battery based Solar Hybrid Inverters and Solar PCUs, focusing on Lithium-based Solar PCUs and Hybrid Solar Inverters installed in the market. Su-vastika aims to replace the existing Tubular Lead Acid market with clean Lithium batteries.

What makes a Su-Vastika ESS so special?

The core of an ESS is a long-lasting, lithium-powered battery. Su-vastika's ESS leverages these advanced batteries to deliver uninterrupted power with faster charging and improved efficiency. The system also features Pure Sinewave technology.

Is Su-Vastika a Star Export House?

Su-vastika is one of the fastest-growing startups with a strong presence in international regions such as Africa, the Middle East, and South-East Asia. Recently Su-vastika Systems Private Limited has earned recognition as a Star Export House from the Government of India on the basis of its export performance.

What makes Su-Kam a great brand?

His focus on quality, affordability, and customer service positioned Su-Kam as a household name and a formidable competitor to international brands. His commitment to research and development led to numerous patents, further solidifying Su-Kam's position as an industry leader. Challenges and Resilience

Here's what makes Su-vastika's Retrofit Lithium Battery special: Universal Compatibility: Works flawlessly with any 12V, 24V, or 48V inverter or UPS, regardless of brand, model, or existing battery configuration (single, double, or four tubular batteries). Capacity: The Lithium-ion battery for Inverter comes in C1 capacity and Lead Acid battery comes in C20 ...

1. The Capacity of the battery we get in Lithium-ion vs. tubular battery: this is the mind-boggling parameter which will be understood by people soon that the Tubular battery comes with a C20 Capacity sticker, or the Solar battery comes with a C10 capacity sticker. The Lithium battery comes in a C1 capacity package.

The difference between C10 and C20 batteries in Tubular batteries is very simple to understand. When we talk of C rating, whether C10 or C20, that denotes the capacity of the battery, whereas, in the Inverter and solar Industry, there is a rumor that a C20 battery is for Inverter/UPS and a C10 battery is for solar applications. I'm

amazed that the whole industry ...

The charging rate of a battery is measured in C-rates. A C-rate is the rate at which a battery can be fully charged in one hour. So, a C/1 rate means that the battery can be fully charged in one hour, a C/2 rate can be fully charged in two hours, and so on.

In several developing nations, power outages are commonplace, whether in residential or business sectors. Su-vastika, one of India's most promising power storage and power start-up companies, is leading the charge and transforming the power backup storage sector in the country. But, in a country like India, where power outages and power cuts occur ...

Suvastika is also offering PCB Functional Testing on a Subscription basis which is the first time any company is offering it as an enterprise solution. Application of PCB Functional Tester: Automated Production testing of analogue/digital electronics assemblies (PCB tests). Functional testing for products like Inverter/UPS, BMS, sensors ...

Here are some of the leading Indian manufacturers of Energy Storage Systems in India: Su-vastika: This startup company is mentored by Mr. Kunwer Sachdev, the founder of Su-kam and known as the Inverter Man of India is making Energy Storage Systems indigenously and installing these systems at a breakneck pace. Su-vastika has already installed ESS systems at ...

Su-vastika has developed the Battery ESS with the Lithium battery bank and has started installing these systems in various pockets. The journey has been quite a learning experience, and we are continuously developing the technology which shall work in an Indian environment where a lot of dust, humidity and heating is all around.

Latest News. The Benefits of Replacing Gensets with Lithium-based Battery ESS August 1, 2023 - 9:06 pm; IGBT-Based Heavy Duty UPS Systems Reliability June 26, 2023 - 1:33 pm; Su-vastika Give Your Inverter/UPS a HEART with Bluetooth or Wi-Fi June 21, 2023 - 4:01 am

The Life of the Lithium battery compared to the Tubular battery: The Life of the Tubular Lead Acid battery is 1/4th of the Lithium Battery as the Lithium battery can give a 3000-cycle life, whereas the Tubular battery has a maximum of 400-500 cycles if we refill the battery water in time. Distilled water is used to top off the battery. The size of the Tubular Lead Acid ...

The Online UPS is designed for computer, and IT loads as the load is almost fixed, so they get very high efficiency. In contrast, the 3-phase Induction motors used in lifts have a varying load as the load varies when the lift moves in upward and downward conditions, so the load varies drastically.

Two generator sets, Automatic Genset & Manual Genset, are attached to the Control Panel that supplies current to the motor for moving the Lift/Elevator upward and downward. If the power supply fails for any

reason like power shortage, Fire, or Natural disaster, the Automatic Genset takes 45 Sec to 1 minute to provide power to the lift. In the same situation, Manual ...

No maintenance: Lithium-ion batteries require no maintenance at all where, whereas lead-acid batteries require a lot of care as they need regular water topping and cleaning, which makes them a big headache for the user as it's very tough to check the water level periodically and fill the distilled water.

Su-vastika uses A1 grade LifePo4 Battery cells for high performance and safety, designed for Inverters as well as Electric Vehicles. Su-vastika has designed a lithium-ion battery bank which is one of its kind and will completely go to improvise the battery industry as well as the Electric vehicle industry too.

Key Advantages. Intelligent Solar Energy Management: Our Su-svastika AI-based 2.5KVA Solar MPPT PCU with a 2.4KW Lithium-ion Battery is not just an intelligent energy solution; it's a cost-saving one, too. By automatically switching to solar mode once the battery reaches 50% charge, it outperforms competitors who require a full 100% battery charge.
