With the design nailed down, I got to building the bench, and I started by ripping some 2x8s down to get my 3 inch wide boards. The reason I went with ripped down 2x8s here, rather than just using 2x4s, is I wanted the sturdier Southern Yellow Pine that 2x8s are made of here in the Southeast, as opposed to the the ultra soft whitewood of which 2x4s are made.

G0899 10" 2 HP 115V/230V Cabinet Table Saw The perfect balance of power, precision, and price in a table saw. We took our rock-solid 10" table saw platform with a powerful 2 HP TEFC motor and paired it with the most efficient dust collection system we could design. The internal dust shroud surrounds the bottom-side of the blade for efficient dust collection.

Some of the horsepower ratings listed and the maximum possible horsepower based on the amount of energy the table saw requires are pretty close, but you have to remember that no motor is 100% efficient. A cheaply made motor will certainly not be very efficient. When looking at two different table saws of similar horsepower, one may have ...
