The Tesla company has been creating sustainable living products and services since they were founded in 2003 So, it's no surprise that their new \$15,000 house (initially planned at \$33,000) is an extremely environmentally friendly house for the masses. What is Tesla Energy? Tesla Energy is a new suite of batteries designed to store sustainable [...]

Installing solar and a home battery provides you with added protection from grid outages and gives you greater control over your home's energy. If your home is part of a virtual power plant that pools energy with other homes in your area, you can receive additional savings and support your community by sending your extra solar energy to the ...

Step 2: Virtual home assessment. As part of Tesla's solar panel installation process, homeowners send in photos of their equipment and system spaces rather than having a crew come out to inspect these areas before installation (which helps bring total costs below the national average). Then, Tesla Solar representatives will create a solar ...

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can use this energy to power the devices and appliances in your home day and night, even during outages. With customisable power modes, you can optimise your stored energy for outage protection, electricity bill savings and more.
