

Timberline solar energy shingle

What is the new timberline solar roofing system?

Solar roof technology so advanced it's simple. The NEW Timberline Solar(TM) roofing system from GAF Energy is based on innovations so advanced they make solar roofing simple. The solar shingles generate energy. And they go on like architectural shingles so you get powerful, reliable energy from a beautiful, cost-effective roof.

What is a timberline solar shingle?

This new system incorporates the world's first nailable solar shingle, the Timberline Solar Energy Shingle(TM) (ES), which is assembled domestically at GAF Energy's manufacturing and R&D facility in San Jose, California.

Where are Timberline solar shingles installed?

Timberline Solar Shingles from GAF Energy are installed by roofing companies in 16 states plus Washington D.C. Comparing GAF Energy to other solar panel installation companies isn't an apples-to-apples situation. Timberline Solar Shingles' customers get to harness solar energy while getting a new roof.

What is a GAF Timberline solar roof?

Image source: GAF Energy The GAF Timberline Solar roofing system consists of solar shingles with 45 watts of output each that are installed alongside non-solar shingles that perfectly align with their solar counterparts. The result is a roof that's built like a traditional shingle roof and also generates solar power.

Is Timberline solar the future of solar?

With access to GAF's national contractor network, GAF Energy is uniquely positioned to bring residential solar to the mass market, transforming more roofs into solar roofs each year. "Solar roofs are the future of clean energy, and Timberline Solar is the game-changing innovation that will get us there," said Martin DeBono, president of GAF Energy.

Is Timberline solar UL certified?

In September 2021, Timberline Solar(TM) achieved UL's 7103 certification, which authorizes GAF Energy to install the system on residential roofs as a roofing product and a solar energy product--the first of its kind to be recognized as both.

Its central innovation is the Timberline Solar Energy Shingle(TM) (ES), the world's first nailable solar shingle. Boasting an industry-defying depth of less than 1/8 inch, the Timberline Solar ES lies on the same plane as the rest of the roof. This creates a final look that is far sleeker than rack-mounted solar panels, all while offering ...
