

Tough tested solar power bank instructions

How to use the solar power bank?

The solar power bank is universal fit for most smart phones, iPhones, Samsung, tablets and other USB-charged devices. Feel free to charge your device with a suitable cable. For daily use, please recharge it with an adapter and a USB cable. Kindly remind that please take solar charging as a backup option due to its single panel.

What is the best solar power bank?

Learn More. The ToughTested 16000mAh solar power bank is a great choice if you are looking for a way to keep your gadgets charged when outdoors or in case of an emergency. ToughTested 16000mAh holds enough power to charge a standard smartphone 5-6 times.

How many USB ports does a Bigfoot solar power bank have?

The two USB-A ports and USB-C port allows you to charge multiple gadgets simultaneously, while the high-capacity battery contains power for long durations. Featuring solar panels, this Bigfoot rugged solar power bank utilizes sunlight to recharge during emergencies for convenience, and the IP67 rating withstands the elements for durability.

How do you charge a power bank?

When the battery dies down, just leave the power bank in the sun and it recharges completely in around 5-6 hours. Unfortunately, there's no other way to charge the power bank. You can't plug it into a wall outlet or even charge it via USB from your laptop.

What is a quick charge power bank?

Allows for emergency charging by using the power of the sun when away from power outlets. Ensures safe use even in tough environments. This power bank includes two USB Type-A ports and one USB Type-C port to charge all your devices at the same time. Quick Charge 3.0 and 18W Power Delivery make fast work of recharging.
