

UI 3741 photovoltaic hazard control

What is ul 3741 hazard control?

According to the UL 3741 PV Hazard Control statement of scope, the standard "provides a means for evaluation of PV hazard control components, equipment and systems that provide a reduced level of shock hazard from energized PV system equipment and circuits located within the PV array."

Does ul 3741 apply to PV installations?

Before jumping into the application of UL 3741 in PV installations, let's take a step back and look at the code requirements driving us to the standard. Section 690.12, Rapid Shutdown of PV Systems on Buildings, is familiar to most PV professionals.

What is UL 3741 Photovoltaic Hazard Control?

UL 3741, Photovoltaic Hazard Control, specifies that controlled conductors located inside the boundary shall be limited to not more than 80 volts within 30 seconds of rapid shutdown initiation. Voltage is measured between any two conductors and between any conductor and ground.

What is the new UL 3741 safety standard?

Underwriters Laboratories, a U.S. nonprofit standards development organization, has published the new UL 3741 safety standard, which is related to the evaluation of PV hazard control functions.

Why is ul 3741 certification important?

If firefighters must access and undertake emergency operations on the roof - whether directly involving the PV array or not - systems engineered to pass UL 3741 certification reduce the risk of firefighters being exposed to life-threatening shock hazards when working around the (potentially damaged) PV array.

How do you pass ul 3741 testing?

To pass the UL 3741 testing, manufacturers must prove that firefighters will not be exposed to shock hazards in various scenarios, including when firefighters fall on PV equipment with tools in their hands. The SMA Sunny Tripower CORE1 is the first free-standing string inverter and the first listed to UL 3741 PV Hazard Control for NEC 690.12.

INTRODUCTION: UNDERSTANDING UL 3741 AND NEC 690.12
UL3741 AND NEC 690.12 2020 NEC 690.12(B)(2) Controlling Conductors within the array boundary
The EcoFoot2+ Photovoltaic Hazard Control System (PVHCS) is a UL 3741 Listed system that complies with NEC 690.12(B)(2)(1), when installed by qualified persons

UL 2703 LISTED UL 3741 LISTED CONFORMS TO ANSI/CAN/UL STD 3741 STANDARD FOR SAFETY PHOTOVOLTAIC HAZARD CONTROL SYSTEM
o Max PVHCS System Voltage: 1000V BX
List of approved PV Hazard Control Equipment or Components evaluated at 1000V Max System Voltage: All

On December 10, 2020, UL Standards & Engagement published ANSI/CAN/UL 3741, Standard for Safety for Photovoltaic Hazard Control. The Standard is specifically intended to establish and expand requirements to help keep firefighters out of hazardous current paths when responding to emergency situations in homes and buildings with PV systems.

ANSI/CAN/UL 3741: Standard for Safety for Photovoltaic Hazard Control First published in December 2020, ANSI/CAN/UL 3741: Standard for Safety for Photovoltaic Hazard Control, provides a means of evaluation for photovoltaic (PV) hazard control components, equipment and systems that reduce shock hazards from energized PV system equipment and ...

The SolarEdge UL 3741 certified PV Hazard Control System and the new Sense Connect feature built into each Power Optimizer provide the safest possible solution to meet rapid shutdown requirements. Conclusion In conclusion, per UL 3741, article 7.1, as SolarEdge inverters and Power Optimizers have been

The clawFR/clawFRplus Photovoltaic Hazard Control System (PVHCS) is a UL 3741 Listed system that complies with NEC 690.12(B)(2) (1), when installed by qualified persons per the installation procedures outlined in the clawFR System Installation Manual and this Addendum.

UNDERSTANDING UL 3741 AND NEC 690.12 2020/2023 NEC 690.12(B)(2) Controlling Conductors Within the Array Boundary The RockIt Photovoltaic Hazard Control System (PVHCS) is a UL 3741 Listed system that complies with NEC 690.12(B)(2), when installed by qualified persons per the installation procedures outlined in the

Find the most up-to-date version of UL 3741 at GlobalSpec. UNLIMITED FREE ACCESS TO THE WORLD'S BEST IDEAS. SIGN UP TO SEE MORE. First Name. ... ANSI/CAN/UL Photovoltaic Hazard Control 1 1.1 Fire fighters (FF) performing operations involving buildings with attached or integrated Photovoltaic (PV) arrays may be exposed to electrical ...

A PV hazard control system listed for the purpose shall be installed in accordance with the instructions included with the listing or field labeling. Where a hazard control system requires initiation to transition to a controlled state, the rapid shutdown initiation device required in 690.12(C) shall perform this initiation." ... Standard for ...

The NXT UMOUNT Photovoltaic Hazard Control System (PVHCS) is a UL 3741 Listed system that complies with NEC 690.12(B)(2)(1), when installed by qualified individuals as per the installation

The TGR, TGT, TGP Photovoltaic Hazard Control System (PVHCS) is a UL 3741 Listed system that complies with NEC 690.12(B)(2)(1), when installed by qualified persons per the installation procedures outlined in the TGR Installation Manual and this Addendum.

INTRODUCTION TO UL 3741 AND NEC 690.12 ANSI/CAN/UL 3741, Standard for Safety for Photovoltaic Hazard Control, provides a means of evaluation for photovoltaic (PV) hazard control components, equipment and systems that reduce shock hazards from energized PV system equipment and circuits in a PV array. Pegasus SkipRail is a UL 3741 Listed ...

UL 3741 addresses evaluation of the operation of photovoltaic hazard control functions. NORTHBROOK, Ill. - Dec. 10, 2020 - Underwriters Laboratories announced today that it published ANSI/CAN/UL 3741, Standard for Safety for Photovoltaic Hazard Control. The Standard provides a means to evaluate the operation of photovoltaic (PV) hazard control ...

Rapid shutdown requirements for PV systems have spurred innovations within the industry since the requirement first appeared in the 2014 National Electrical ... Solar Builder Q1 2023: Hazard control: Understanding UL 3741 and new rapid shutdown solutions

The UL 3741 Standard for Photovoltaic Hazard Control was introduced in 2020 to reduce potential firefighting hazards around photovoltaic (PV) systems. However, three years on, questions are being asked about whether the standard certification process is as robust as it needs to be. Here, Bill Brooks, Principal, Brooks Engineering, and Jason Bobruk, Director of ...

ul 3741 listed pv hazard control electrical equipment tesla 3 solis 4 introduction: understanding ul 3741 and nec 690.12 5 installation methods per ul 3741 and nec 690.12 5 case 1: ul 3741 listed system, single array 6 case 2: ul 3741 listed system, contiguous sub-array 7 case 3: ul 3741 listed system, multiple arrays 8

As debate continues regarding the unintended consequences of the Module Level Shutdown requirement in the National Electric Code (NEC, section 690.12), some experts consider UL 3741 as the solution to these problems. It's time for a closer assessment. The idea behind UL 3741 is to provide "a means of evaluation for photovoltaic (PV) hazard control ...
