

Un 3090 lithium metal batteries

Does a lithium battery Mark have a UN number?

Yes. The mark may bear all applicable UN numbers, e.g. UN 3091, UN 3481, to identify that the package contains lithium metal batteries packed with or contained in equipment and lithium ion batteries packed with, or contained in equipment. J. What are the requirements for the telephone number on the lithium battery mark?

What is a lithium battery?

Lithium Battery - The term "lithium battery" refers to a family of batteries with different chemistries, comprising many types of cathodes and electrolytes. For the purposes of the DGR they are separated into: Lithium metal batteries. Are generally primary (non-rechargeable) batteries that have lithium metal or lithium compounds as an anode.

Can a damaged lithium battery be transported on a plane?

Damaged lithium batteries are forbidden from air transport. See page 06 of this guide for information on damaged batteries. These shipments are forbidden to be transported as cargo on passenger aircraft. 2 batteries. n/a.

Can a lithium battery be shipped with other hazardous materials?

Lithium metal cells and batteries must not be packed in the same outer packaging with other hazardous materials. A shipment that exceeds the quantity limitations in the table, the overpack limit, or consignment limit, must be shipped as a fully regulated lithium metal battery (See Guide 05 for provisions).

What are the requirements for a lithium battery?

The lithium batteries must be of a type that have successfully passed the UN38.3 tests and contain the necessary systems to prevent overcharge and over discharge between the batteries.

Are lithium batteries rechargeable?

Lithium batteries fall into two broad classifications; lithium metal batteries and lithium ion batteries. Lithium metal batteries are generally non-rechargeable and contain metallic lithium. Lithium ion batteries contain lithium which is only present in an ionic form in the electrolyte and are rechargeable.

UN 3090, Lithium metal batteries <1g lithium content NA <2g lithium content NA. Allowable Net Mass Per Package Shippers Dec? Labels/ Markings UN Spec Required? Additional? (PAX) Forbidden 2.5kg (CAO) YES. Lithium Battery Mark + Class 9 + CAO Label. No UN Spec. 1.2 m drop test. 3 m stack test

UN Number and Proper Shipping Name UN 3090, LITHIUM METAL BATTERIES Battery Testing Data LITHIUM METAL CELLS OR BATTERIES MUST MEET THE REQUIREMENTS OF EACH TEST IN THE UN Manual of Tests and Criteria, Part III, subsection 38.3. A cell or battery and equipment containing a
