

What planet is aquarius in right now

When does Mercury enter Aquarius?

When: February 5 - February 22, 2024 Mercury, the planet of communication and collaboration, entered Aquarius earlier this month on February 5, 2024, ushering in a new wave of ideas and creative thinking. With Mercury in Aquarius, we recognize that playing by the rules isn't getting us where we'd hoped.

How many celestial bodies are in Aquarius 2024?

Between February 16 and February 18, 2024, five celestial bodies - the sun, Mercury, Venus, Mars, and Pluto - will be sitting on top of one another in the sign of Aquarius. That's a lot of unrestricted rebellious energy, all fighting for your attention.

Is Aquarius a fixed sign?

Aquarius is the last air sign, making it concerned with thought, intellect, and reasoning as well as how we communicate and how we organize information. It is also a fixed sign, which means that, like the other fixed signs (Taurus, Leo, and Scorpio), it wishes to maintain the current state of things.

When does Mars Enter Aquarius?

Mars entered Aquarius on February 13, 2024, causing our ambitions and priorities to shift. From now until March 22, the planet of action and ambition asks us to stand in solidarity with our neighbors and challenge authority. During this time, the focus shifts from personal achievement toward collective action. A better future is possible.

When does Venus enter Aquarius?

When: February 16 - March 11, 2024 Venus entered Aquarius on February 16, 2024, asking us to rethink our outdated views on romantic love. You may be feeling trapped by society's expectations of you and yearn for a sense of freedom. You might become more open to deepening your platonic relationships and friendships.

What is planet position in astrology?

Planet position is a diagrammatic representation of the condition and positions of the celestial bodies at any given time for any given location on Earth. Planet position forms the base that sets the mechanics of astrology in motion.

The planets/points included in this ephemeris are the Sun, Moon, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune Pluto, and the True North Node. While the inner planets and luminaries move relatively quickly through the signs, the outer planets take many months or years to do so.

What Planets Are in Retrograde Right Now? In ancient astrology, it was accepted that planets in retrograde were journeying through the underworld, gathering insights, perspectives, and information from the unseen world. This understanding was used as a metaphor for what happens within our inner worlds when a planet is

What planet is aquarius in right now

in retrograde.
