

Where the sky lives

Where the Sky Lives is an excellent middle grade novel about grief, environmentalism, and family. Tuesday Beals lives in Zion National Park where her mom, Dana, is an archaeologist. Her best friend Carter also lives in the park with his stepdad who is a park ranger. Tuesday and Carter love to hike, rock climb, and watch the stars.

NOTE: values for the closest approach are computed with a sampling interval of 1 day. Light Curve. The following chart is the predicted light curve (visual magnitude as a function of time) of Saturn, according to the most recent ephemerides data. Magnitude data is sampled with a 2 days interval and there might be inaccuracies for objects changing brightness very rapidly during ...

Interactive sky chart. An online planetarium application that shows where to locate Mercury in the sky from your location. Live position tracker. A high precision sky chart that uses real deep sky imagery to help locate Mercury with your telescope or on your astrophotographies.

From the author of *Five Things About Ava Andrews* comes a new middle grade stand-alone novel with STEM and activism themes, set against the backdrop of beautiful Zion National Park.

From the author of *Five Things About Ava Andrews* comes a new middle grade stand-alone novel with STEM and activism themes, set against the backdrop of beautiful Zion National Park. With the perfect blend of humor and heart, this poignant story abo...

This section provides a comprehensive list of the bright comets currently visible in the sky. This list is updated with new information several times per day. Comets for which there is data from recent observations reported in the Comet Observation database (COBS) are listed first, in order of decreasing brightness.

Mercury live position and data. This page shows Mercury location and other relevant astronomical data in real time. The celestial coordinates, ... The sky map shown in the background represents a rectangular portion of the sky 60x40 arcminutes wide. By comparison the diameter of the full Moon is about 30 arcmins, so the full horizontal extent ...

When life doesn't make sense, twelve-year-old amateur astronomer Tuesday Beals has always looked to the stars above Zion National Park, where she lives. Her beloved late uncle Ezra taught her astronomy, but now their special stargazing sites are all she has left of him, along with his ashes and a poem that may be a riddle.

Interactive sky chart. An online planetarium application that shows where to locate Neptune in the sky from your location. Live position tracker. A high precision sky chart that uses real deep sky imagery to help locate Neptune with your telescope or on your astrophotographies.

This page shows James Webb Space Telescope location and other relevant astronomical data in real time. The celestial coordinates, magnitude, distances and speed are updated in real time and are computed using high quality data sets provided by the JPL Horizons ephemeris service (see acknowledgements for details). The sky map shown in the background represents a ...

2 days ago· The ZHR value refers to the Zenithal Hourly Rate, i.e. the average number of meteors an individual observer could see in an hour, assuming perfectly dark sky conditions. This number is an estimate, the number an observer could see in real conditions depends on the actual intensity of the shower (which can be highly variable) and on the sky conditions.

Interactive sky chart. An online planetarium application that shows where to locate Comet C/2023 A3 (Tsuchinshan-ATLAS) in the sky from your location. Live position tracker. A high precision sky chart that uses real deep sky imagery to help locate Comet C/2023 A3 (Tsuchinshan-ATLAS) with your telescope or on your astrophotographies.
