

Is energy storage a profitable business model?

Although academic analysis finds that business models for energy storage are largely unprofitable, annual deployment of storage capacity is globally on the rise (IEA, 2020). One reason may be generous subsidy support and non-financial drivers like a first-mover advantage (Wood Mackenzie, 2019).

Does energy storage configuration maximize total profits?

On this basis, an optimal energy storage configuration model that maximizes total profits was established, and financial evaluation methods were used to analyze the corresponding business models.

What is the investment benefit coefficient of energy storage technology?

Therefore, this study uses the unit annual peaking capacity of the energy storage system for the solution, that is, the investment benefit coefficient of the first energy storage technology is 140 (14,000 MWh/100 MWh).

What is the investment opportunity value of energy storage technology?

A firm choosing to invest in energy storage technology is equivalent to executing the value of the investment option. In this study, the investment opportunity value of an energy storage technology is denoted by  $F(P)$ , that is, the maximum expected net present value when a firm invests in an energy storage technology.

How does policy uncertainty affect energy storage technology investment in China?

Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China. Subsidies of at least 0.169 yuan/kWh to trigger energy storage technology investment.

What is the value of energy storage technology?

Specifically, with an expected growth rate of 0, when the volatility rises from 0.1 to 0.2, the critical value of the investment in energy storage technology rises from 0.0757 USD/kWh to 0.1019 USD/kWh, which is more pronounced. In addition, the value of the investment option also rises from 72.8 USD to 147.7 USD, which is also more apparent.
